

TOSA INU COIN

WHITE PAPER

INTRODUCTION

The Tosa Inu coin was born in May 2021. Starting with DOGE coin, Shiba Inu coin, Akita Inu coin, Kishu dog coin, and other emerging coin with a lineup of Japanese dog breeds have brought a significant flow into the meme coin ecosystem. Tosa Inu Coin is entirely decentralized, and it is one of the grand experiments to see what kind of value it may bring as a kind of meme coin in the future.

What if the various meme coin projects mentioned in the precedent were 100% implemented by the community? The term DeFi includes the term decentralized, which is related to economic conditions.

Which underlies the foundation of the project community's involvement is the pristine wilderness. As we move further away from our rigorous financial structure and traditional thinking, we are free to solve problems and discover new, interrelated solutions. In a world dominated by the commercialization of time, community-driven projects are more than just a change in pace, but a way to practice the fundamental acceptance of others. When success depends on the common strength of the individuals that make up the collective, we are forced to change our perspective to be in line with those around us.

The Tosa Inu ecosystem is our way of recognizing the importance of breaking this long-established paradigm. Communities are organized by hundreds, if not thousands, of interconnected moments. By studying the people drawn to our project, we have realized that true strength does not come from us alone, but from when we work together in harmony. That thought came to our mind, and we started developing Tosa Inu coin in earnest.

This whitepaper is based on and takes into account certain known and unknown contingencies and risks. The estimation of results, or in fact and substantially, may differ from the notable statements or results estimated or expressed in such forward-looking statements here.

Why Tosa Inu?

Centralization is now at a crucial crossroads in innovation. Until now, centralization has been the norm and a prerequisite for all business structures. However, we learned that centralized systems, including political, educational, and financial systems, failed to equally and ethically distribute power to those functioning within them. While humankind has grown in such a centralized system, it's time to rethink it.

In an ever-evolving world, cryptocurrencies without originality are struggling. If the rules of the coin are changed against their intentions, they have no choice but to obey. The best way we could think of was to work on community building from a fresh perspective. Among our team, we call it the Tosa Inu project. This wasn't just a name. We started from zero and started from zero. Creating something out of nothing is the spirit of our project.

Tosa Inu (Tosa Dog) is an elegant fighting dog that originated in the Shikoku region of Japan. Its majestic appearance has something to fascinate and attract what you see. We respect such Tosa dogs and are equally excited about the future of this coin. The founder, Take, understands the meaning of coins with numerous dog marks as memes and believes on the potential of this Tosa dog coin.

Tosa Inu project is lead by the world-class developers, designers, moderators, marketers, and Schiller, working together to maximize the positive impact that Tosa Inu Coin can bring to the world.

ABSTRACT

Welcome to the community of Tosa Inu Coin, the great Japanese fighting dog. Tosa Inu Coin was born in May 2021 as a latecomer project of dog-based meme coins to break away from centralization. The mission of Tosa Inu Coin is to dispel the existing cryptocurrency concept and provide owners with experiences such as decentralization. TOSA's NFT and Defi are based on a new philosophy. The TOSA product includes \$ TOSA TOKEN, one of the ERC20 tokens that provides value to holders.

Token swap

We plan to list on a decentralized exchange with custom features that allow owners to exchange any ERC20 token for another token. Token swaps are essential to the growth of the TOSA ecosystem and we want to continually expand this ecosystem to bring more and more interests to the TOSA platform. We hope to succeed in moving the entire project forward by connecting swaps and the ecosystem, coming out of the centralized Tosa dog coin and the power of the community.

TOSA Crate

We plan to offer an NFT marketplace where users can bet TOSA and earn NFTs. The Marketplace will introduce artists from the community contest, who will make a portion of their staking fees through \$ TOSA tokens and track their passive income.

ECOSYSTEM & TOKENOMICS

Completed in May 2021, TOSA INU COIN is a decentralized token. It is currently listed on the UniSwap, the world's largest and most secure DEX, where users can exchange any ERC20 token. Half of it is placed in UniSwap to increase liquidity. That is the beginning of our project. We are experimenting with making 5000 trillion tokens available to anyone and building the first voluntary community in a decentralized environment. We plan to exponentially exceed the market value of Shiba Inu coin, Kishu Inu coin, Akita Inu coin, and even Dogecoin.

In the future, owners will be able to enjoy more benefits by having \$TOSA tokens. After being traded on the early UniSwap, professional marketers will carry value-enhancing activities and will increase in value over the years. If that happens, in the future, we will also be able to donate some of our profits to animal welfare organizations.

Furthermore, we are also increasing the partnership with a wallet that can store \$ TOSA. Holders will use it to view statistics / passive income, total balances and US dollars, price charts and, more.

We are experimenting with meme coin that grows in an unprecedented way. At this moment, a tremendous number of TOSA INU COIN are already born, and many will try to chase our swaying tail.

VALUE OF TOSA COIN

Transparency

An entirely decentralized token, \$TOSA is recorded on the blockchain, and the holder can openly see all the information that has not been tampered with. This transparency allows fairer trading.

Community

The Tosa Inu project will encourage the group efforts related to management, marketing, development and the community.

Future

Tosa Inu will grow over a long period. We plan to enable longterm development of ecosystems that go beyond temporary trends and bring fruitful investment opportunities.

Trust

Trust is paramount in the cryptocurrency market. It means not only transparency but also security related to the holder's funds are important features. Examples may include auditing of the code and destroying or burning some of the liquidity tokens to eliminate the risk of malicious behavior.

TOSA TOKEN

\$ TOSA is an ERC20 token released on the Ethereum blockchain in May 2021. The maximum supply is 10,000,000,000,000,000, which is very large compared to existing cryptocurrencies.

\$ TOSA Token further enhances the trust of the owner.

Where to buy \$ TOSA

UNISWAP

Fifty percent goes to the financial relief needed by developers, managers, and marketing teams to focus their ecosystem full-time. We want these talented individuals to continue to build on the solid foundation they have given us with their own time, money, and energy.

-Developers: This allocation allows each volunteer developer to be rewarded for their initial investment in TOSAINUCOIN and also be able to provide salaries, allowing them to work exclusively in the ecosystem for the next few years.

-Marketing: So far, the Tosa dog ecosystem is even more impressive.

The team can develop international marketing strategies such as commercials to make \$ TOSA a novel and mainstream cryptocurrency name and share its rank with other major cryptocurrencies.

ROADMAP

1,000 holders

- Launching a website
- Community Marketing Fund
- Marketing campaign

5,000 holders

- Website redesign
- 10,000 holders
- 10,000 Telegram members

20,000 holders

- TOSA swap (decentralized • exchange)
- Initial CEX list (Hotbit, Bilaxy, CoinTiger)
 - 15,000 Telegram members

30,000 holders

TOSA Marketplace

Wallet and passive income tracker

- Goods store
- 3 more CEX lists
- 50,000 Telegram members

100,000 holders

- Influencer marketing partnership

Our roadmap is planned to ensure our continued advantage in this highly competitive area. By publishing a basic overview, owners can understand the intent of the core development team. In the future, Tosa dogs will be standardized and integrated into the global market for long-term success.

THE FUTURE OF TOSAINU COIN

Conclusion

Tosa dog coin started from the seed of the idea. It wouldn't have happened without our team, money and leaders. Will this coin actually work? Can you get inside the current dog coin and play an active role?

Now that we have a mission to create the brand Tosa Inu and expand this ecosystem, the volunteer team has done a great job and will continue to build the future of memecoin finance through Swap. It will be a thing.

This is the beginning of a new era of decentralized communities. When the time comes, TOSAIN UCOIN will become an important point of contact between the decentralized world and the global community, and we will be able to do it.

I would like to thank each and every one of you. It wouldn't be possible without your help.

Now it's time to get started. Let's grow together

AT THE END

Acknowledgments

This project was the cumulative effort of the TOSAINU team and would not have been possible without the support of partners, advisors and the community.

This white paper was written by an early member of the Tosa Inu team. We also received valuable feedback from emails, social media and meetings.

Thanks to all the advisors and collaborators for their valuable conversations.

We would also like to thank those who helped with proofreading and document structure.

Thank you.
